INFONET's BASIC permits many users to share a central computer conversationally from standard keyboard terminals. The BASIC language may be used by the newcomer or by the experienced professional. Use of our incremental compiler allows interruption of program execution at any point to inspect and change values, add or remove statements, or to immediately execute individual statements. INFONET's BASIC includes global, area, and specific editing; character manipulation within strings; extensive file capacity; and large program size.

Our conversational Remote Job Entry (CRJE) enables the user who requires an extensive computer capability to conversationally develop, pre-test, and execute programs and data from a standard keyboard terminal in his office. Output may then be received at a low-speed terminal or a high-speed device. CRJE converses in FORTRAN, COBOL, and Assembly Language. The CRJE user can call back statements, change values, and perform all editing functions available to the BASIC user.

INFONET's Remote Job Entry (RJE) facilitates processing of large production jobs through a variety of high-speed terminals. It may be used in conjunction with CRJE. RJE provides an attractive alternative to a user considering installation or expansion of data processing equipment. It permits companies to utilize programs too large, complex or expensive for their own equipment. It also offers an economical backup for data processing overloads. Available languages are FORTRAN, COBOL, and Assembly Language.

Computer Sciences Corporation was founded in 1959. Its first project was the development of the first major business-oriented compiler for a large computer manufacturer. Since then the company has designed over 40 compilers and a dozen operating systems. CSC has served every major computer manufacturer and a broad range of computer users in industry, government, and education. In 1963, Computer Sciences Corporation offered the first commercial sharing of a large central computer facility to remote terminals. REMOTRAN, from a Los Angeles center, serviced clients as far away as Houston, Texas. Standard CSC applications have been installed throughout the world as well as utility packages designed to assist the data processing manager, including COGENT and EPG-II. The company has steadily expanded its capabilities into a broad range of disciplines including communications, systems engineering, education, and facilities management.

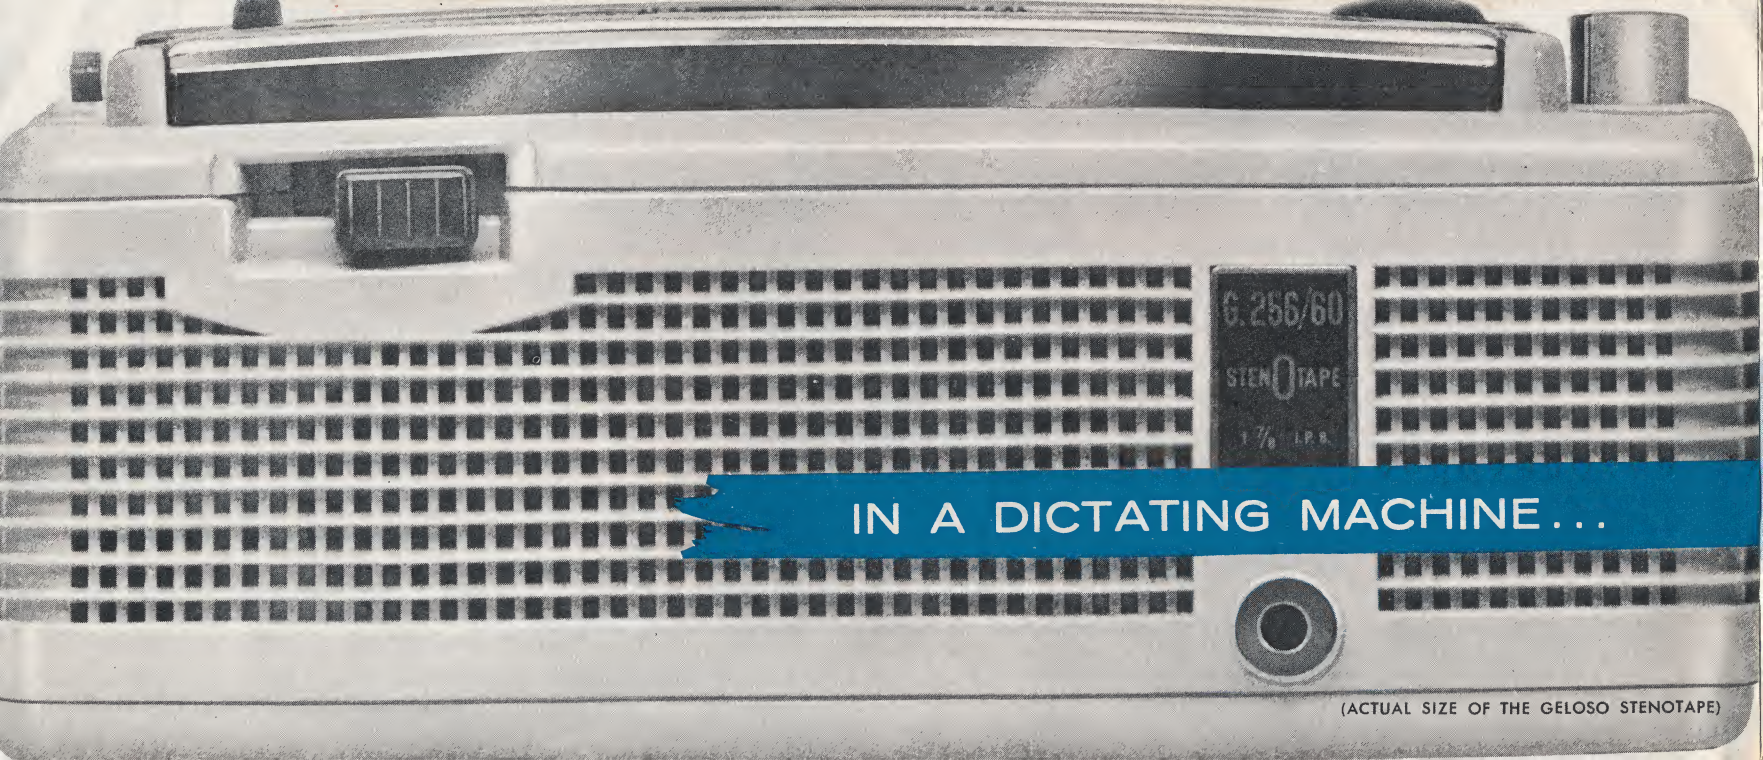

In 1964, CSC was the first computer software firm to be admitted to the American Stock Exchange, and in 1968 became the first such firm listed on the New York Exchange. The corporation stands today as a major link joining the Computer Sciences with the Information and Systems Sciences. These capabilities have been instrumental in the creation of the Information Network Division of Computer Sciences Corporation.

IN A DICTATING MACHINE...

(ACTUAL SIZE OF THE GELOSO STENO TAPE)

IN A DICTATING MACHINE *Fidelity* MAKES THE DIFFERENCE

\$179.95

Federal Excise Tax included

IN THE OFFICE, exclusive relaxed dictation design (no hand-mike to cramp your dictating style) makes the new Geloso StenOtape machine easiest of any to dictate into. Records **every word** you utter up to 30 feet away.

Let your secretary transcribe from it (no missed words here) and she'll tell you it's the closest thing to person-to-person communicating. Plays back as clearly as you spoke.

AT HOME, your Geloso StenOtape doubles effortlessly as a home tape recorder. Tapes and plays concert music with a fidelity that astonishes hi-fi enthusiasts.

Fidelity, matched by no other dictating-transcribing machine, makes the startling difference completely evident the first time you use the Geloso StenOtape—in your office, traveling, or at home.

GELOSO
.....
STENOTAPE

ONLY THE GELOSO STENOTAPE BRINGS YOU ALL THESE ADVANTAGES

- Fidelity — records and plays speech or music up to 30 feet away
- Compatible — uses standard tape reels
- Long Play — 2 hour endlessly re-useable magnetic tape
- Low Priced — even the "one-man" office can afford
- Portable — weighs 6½ lbs., plugs in anywhere
- Tape Counter — precision designed to pinpoint anything recorded
- Versatile — record and play anywhere; office, home, car, boat, plane
- Compact — see front cover; actual size of Geloso Stenotape
- Easiest to Operate — just press and dictate; make a mistake, erase and correct
- Easiest to Transcribe from — plays back as clearly as you spoke, never a missed word
- Economy — one tape is all you need; endlessly re-useable, never wears out

EXECUTIVE

PROFESSIONAL

EDUCATOR

or just for
FUN

ALL THIS AND GUARANTEED, TOO, FOR 1 FULL YEAR

\$19.95

Finger-Tip Control HC44/6 — for Stop, Playback, Rewind functions when dictating; Stop, Start, Backspace when transcribing

\$24.95

Desk Pen Microphone M55—executive styled, with ball-point pen, for relaxed office dictation or discreet recording

OPTIONAL ACCESSORIES ADD DOZENS MORE USES

\$19.95

Foot-Pedal Control FP33/6 — is similar to Finger-Tip Control but located on floor for toe touch

\$14.95

Stereo Headset C41 — duplicates natural listening for your secretary's comfort or your own private playback

Stenotape and accessories save up to 40% executive time, effectively doubles your secretary's typing production — gives you more uses from one machine than any 2 others on the market.

\$14.95

Attache Carrying Case CC32 — holds everything you need away from the office; Stenotape, personal papers, etc.

STENOTAPE IS MADE BY GELOSO OF MILAN, ITALY, EUROPE'S LARGEST INTEGRATED ELECTRONICS MANUFACTURER

\$6.95

Telephone Pick-up Connector 9010 — suction cups on to phone for simplest recording of both conversations

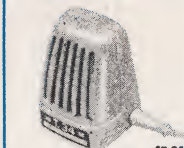

\$14.95

Double Earphone C38 — a convenient headset for transcribing or private listening

\$9.95

Single Earphone C39 — for easy transcribing, allows one ear open for phone, verbal instructions, etc.

\$7.95

Desk Microphone T34 — is standard equipment with StenOtape machine. Ultra-sensitive crystal.

\$7.95

Lapel Microphone T29 — for walk-around recording more than 30 feet away, or while driving

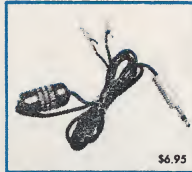

\$18.00

Professional Microphone M50 — recommended for music, parties or Master of Ceremonies

\$6.95

Swivel Base B85 — Stand only for professional microphone

\$6.95

Radio Pick-up Connector 9014 — for recording directly from radio, television, phonograph or other tape recorder

\$2.95

External Speaker Connector 353 — to bypass StenOtape speaker when using separate external speaker

\$2.95

External Amplifier Connector 365 — for playing a recording to large audiences through power amplifier

\$24.95

Vibrapack Inverter 1507/6 and 1508/12 for 6 or 12 v. car, boat or plane operation

\$39.95

Vibrapack Transistorized Inverter 1606 and 1612 for 6 or 12 v. car, boat or plane operation

\$1.25

Log Pad LP100 — ten printed pads, 25 sheets each, for notes to your secretary.

\$3.50

105/N—1/2 mil., Du Pont Mylar, strongest most durable, 2 hr. play

\$2.45

102/N—1 mil., highest quality acetate, 90 min. play

\$1.00

Tape Reel Box 9024 — special plastic container supplied free with each purchase of 6 reels of tape

\$6.95

Extension Cable 9017 — 25 foot microphone extension increases recording distance to 55 feet

\$9.95

Microphone Mixer 9018 — when 2 microphones are required to record, as for use with large audiences or conferences
